

ANTISEPTIC GEL — Ethyl Alcohol

STERIGEL®

WATERLESS ANTISEPTIC Hand Gel with broad-spectrum action, containing 70% V/V Ethyl Alcohol

Professionals in infection prevention and control know that hands are the most frequent carriers of infections. Handwashing, with usual soap or with an antiseptic soap, is the most effective method for reducing transmission of infections. But when a waterless alcohol-based antiseptic is needed, *STÉRIGEL®* is the product of choice.

CHARACTERISTICS

- ☉ Active Ingredient: 70% V/V Ethyl Alcohol
 - Antiseptic gel that acts in 30 seconds
 - Effective against Gram positive bacteria, Gram negative bacteria, fungi and viruses
 - Hypoallergenic
 - Fragrance-free
 - Not absorbed through skin
 - With moisturizer
 - Dries quickly and leaves a gentle sensation on hands
- ☉ Compatible with *Néoderm* soap and *Revive* moisturizing lotion

INDICATIONS

- ☉ *STÉRIGEL®* is used if the health of the patient or sanitary conditions require highly effective antiseptics of hands.
- ☉ *STÉRIGEL®* is used if handwashing is not possible due to insufficient time between patients.
- ☉ *STÉRIGEL®* is used if handwashing is not possible due to absence of washing facilities.
- ☉ *STÉRIGEL®* is used in hospitals and other healthcare settings, in home care and schools.
