

Directions

STÉRIGEL^{MD}

BETWEEN REGULAR HANDWASHINGS, ON CLEAN, DRY HANDS:

Dispense Stérigel into the palm of one hand, about the size of a quarter.

1. Rub the palm of your "wet" hand against the palm of your dry hand.
- 2.-3. Dip all your fingernails in the gel.
- 4.-5. Rub hands together in order to evenly distribute the gel:
 - on the palm of your hands
 - on the entire surface of your fingers
 - between your fingers, with special care between thumb and index
 - on the top of both hands
 - on the base of your wrists

Let hands dry completely.

Do not touch any object until Stérigel is completely evaporated.
